### Making Polygons:

**Instructions:** Using a geo-board, create the polygon that is mentioned below each question. Draw the shape that you have created using a ruler in the box provided. Then write out a) the type of polygon (regular/irregular) and b) the name of each polygon that is found below each picture. If there is a polygon that has equal sides, be sure to indicate this on your drawing.

I have 5 sides that are not equal

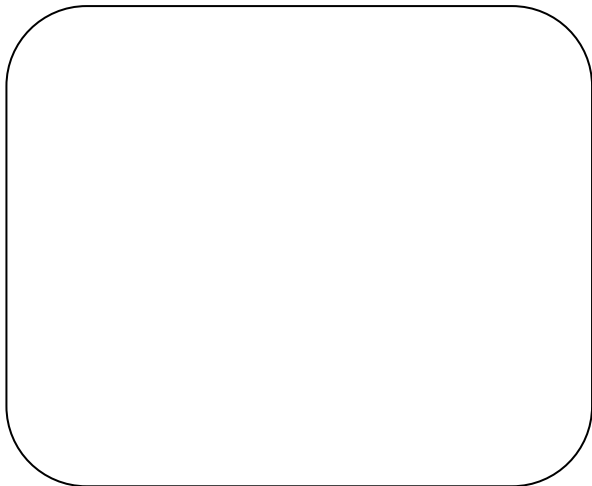

\_\_\_\_\_

I have 2 different names.  
I have 4 equal sides and 4 equal angles
